

# PREMIUM GARDEN BLEND

Handcrafted in the BC Interior, our Premium Garden Blend is a careful mix of OMRI Certified Organic Compost, mushroom manure, sand, silt, and fibre fines. Our Garden Blend is locally sourced, rich in nutrients, and specifically designed to benefit your home vegetable gardens, and urban agricultural projects.

PREMIUM GARDEN BLEND	SOIL PROPERTIES			NUTRIENT & QUALITY PARAMETERS							
	SANDS	FINES	ORGANIC MATTER	TOTAL NITROGEN	C/N RATIO	AVAILABLE PHOSPHORUS	AVAILABLE POTASSIUM	AVAILABLE CALCIUM	AVAILABLE MAGNESIUM	pH	SALINITY (EC)
	%	%	%	%	ratio	ppm	ppm	ppm	ppm	unit	dS/m
	42.00	28.00	30.00	0.88	21:1	374.00	3148.00	5106.00	1085.00	7.00	3.40

## USAGE

- For gardens, install at minimum 300 mm (12”) depth
- For larger trees you may want a 600-900 mm bed (24-36”)
- Blend into or top-dress existing soil

## CORE BENEFITS

- Versatile product for various projects
- Balanced C:N ratio for release of essential nutrients
- Natural water holding capacity with draining elements
- Locally sourced and environmentally sustainable
- Environmentally sustainable
- Low maintenance with minimal fertilization required in first 3 years
- Cost effective, safe and proven

## ADDITIONAL INFORMATION

1. Our Premium Top Soil contain all of the nutrients plants need for growth. Nutrients are released slowly as the organic matter in the soil breaks down, therefore plants are provided with a steady supply of nutrients over several growing seasons.
2. Sites using our top soil should not require fertilization for two growing seasons except nitrogen which should be applied after several months of plant growth, or at the beginning of the second growing season.
3. Amending sites with our Premium Top Soil will improve moisture retention and may require less irrigation.
4. Our Premium Top Soil meet all BC regulatory requirements and are effective for all landscaping uses.
