Premium Black Mulch

Naturally black. No dyes. A rich, finished look for flower beds, shrubs & landscaping.

Why is it black?

The number-one question we hear. There are no dyes or colourants in this mulch — its deep black colour comes from the production process and the slight natural decomposition of the wood fibre. That same process also gives it a better FireSmart rating than raw bark mulches.

WHAT IT IS

A finer, denser premium mulch with a rich black appearance that holds its colour with little fading in the sun. Ideal for flower beds and shrubs.

A coarser black mulch is also available for larger projects, slopes and windy areas.

BENEFITS

- ✓ Suppresses weeds
- ✓ Holds moisture at the roots — less watering
- ✓ Feeds the soil with organic matter and nutrients as it slowly breaks down
- ✓ Insulates roots — cooler in summer, winter protection
- ✓ Rich, even colour with little fading
- ✓ Safe for people, plants and pets

HOW MUCH TO APPLY

Flower beds: 5–7 cm deep

Trees & shrubs: 7–10 cm deep

Keep mulch clear of trunks.

COVERAGE

1 cubic yard at 3" deep

covers about 108 sq ft

TYPICAL ANALYSIS

Organic matter 65% • Nitrogen 2.0% • Phosphorus 1.0% • Potassium 0.4% • pH 6.0–7.0
